## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I (claims 21-24) in the reply filed on 2/12/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5-8 of U.S. Patent No. (6,833,126) hereinafter (US '126) in view of Collier, Jr. (US 6,397,790).

With respect to claim 21, claim 5 of US '126 teaches all claim limitations of instant claim 21 except for having a second heating gas tube connected to the mixed gas feed tube to introduce a high-temperature heating gas tube from the outside. US 6,397,790 teaches a fuel reforming apparatus, using methanol (col. 1, lines 34-36) as one of the fuel option, wherein exhaust gases are mixed with fuel to be reformed in order to treat said fuel and provide energy to the endothermic reforming reaction (col. 5, lines 15-29). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a portion of the exhaust gases generated in the combustor of the instant application to the reformer mixed gas feed tube, as taught by US 6,397,790, in order to treat the fuel stream and provide energy to the endothermic reforming reaction.

With respect to claim 22, claim 6 in US '126 teaches all claim limitations of instant claim 22.

With respect to claim 23, claim 7 in US '126 teaches all claim limitations of instant claim 22.

With respect to claim 24, claim 8 in US '126 teaches all claim limitations of instant claim 22.
